

*Animal mating science
meets party game fun.*

4-8 Players 45 Mins. Ages 17+

Mate is an adult board game about animal mating behaviors and anatomy. Drawing from more than 100 studies, the game is designed to engage audiences with scientific research in a playful, discussion-driven format that sparks curiosity about the natural world.

Players collaborate to speculate wildly about science-based questions. Each card offers a challenge, answer, and bonus fact, sparking debate and discovery each round.

“From the moment we opened it, we were laughing and engaged in conversations that we never thought we’d have. It’s super easy to play, wildly entertaining, funny and educational!”

Contents

Field guide
128 specimen cards
Card catalog box and tabs
